

### Shorter stays in

Emergency Departments

### Shorter stays in Emergency Departments

The target is 95 percent of patients will be admitted, discharged, or transferred from an Emergency Department (ED) within six hours. The target is a measure of the efficiency of flow of acute (urgent) patients through public hospitals, and home again.

### Better

Diabetes and Cardiovascular Services

### Better diabetes and cardiovascular services

This graph represents the average progress made by a DHB towards three target indicators:

- 90 percent of the eligible adult population will have had their cardiovascular disease risk assessed in the last five years;
- an increased percent of people with diabetes will attend free annual checks;
- an increased percent of people with diabetes will have satisfactory or better diabetes management.
